-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The disclosure is objected to because of the following informalities: on page 4-5, the applicant has a brief summary which is not considered a brief summary because it is essentially a repetition of the claims.

Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2,5 are rejected under 35 U.S.C. 102(a) as being anticipated by Kida.

Kida teach an image forming apparatus comprising a fan 107 which pulls air out of the image forming apparatus via a duct 120 (see Fig.14). The duct comprises a pair of plates with a gap therebetween. An image exposing scanning unit 46 is positioned on top of the duct and comprises a polygonal mirror and motor 46a. Heat dissipating fins 120a are positioned in the air flow of the duct (see Fig.18).

3. Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Ayash et al.

Ayash et al. teach a frame structure 40 for supporting modules by attaching them to the frame. The frame structure can be used with many different modules configurations (col.3, lines 26-29). A plurality of holes 50 are made (selected) on at least one frame (plate) depending on the configuration (col.3, lines 44-46) desired at manufacturing.

4. Claims 3-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Guelfo et al., Serita, Hollar et al., Kenichi (JP), Ibe (JP), and JP '167 all teach various airflows through an image forming apparatus.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Beatty whose telephone number is (571) 272-2130. The examiner can normally be reached on M-F from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Arthur Grimley, can be reached on (571) 272-2136. The fax

phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
